PROFESSIONAL SUMMARY

Data Analyst with long experience in reporting and business analysis, working mainly with sales and operational performance data. At DEWA, provides the SLA and workforce analysis that supervisors use to allocate manpower in a large contact center; previously analyzed sales performance as a BI Analyst. Builds Power BI and Excel dashboards, writes SQL to prepare the data behind them, and automates recurring reporting with Power Platform and Python to cut manual work.

TECHNICAL SKILLS

- **Business Intelligence:** Power BI (DAX, Power Query, data modelling, Calculation Groups), Tableau, KPI dashboards
- **Data & Databases:** SQL (SQL Server, MySQL), Python (Pandas, NumPy, Matplotlib), ETL, data cleaning, Git/GitHub
- **Reporting & Automation:** Advanced Excel, MIS reporting, Power Automate, Power Apps, SharePoint, Microsoft Forms
- **Domain & Systems:** Sales and business performance analytics, contact-center and workforce KPIs; Avaya, Salesforce, SAP

PROFESSIONAL EXPERIENCE

Performance and Reporting Analyst **Jan 2022 – Present**

Dubai Electricity and Water Authority (DEWA) | Dubai, UAE

- Create daily, weekly and monthly SLA and workforce reports for a 250–300-agent contact center, used by supervisors and account managers to allocate manpower and keep service levels on target.
- Analyze actual staffing against received and dropped interactions and agent idle time to spot coverage gaps and support staffing decisions aimed at meeting SLA targets.
- Pull SLA and operational data from Avaya and check it for missing values, duplicates and format errors before release.
- Build and maintain the Power BI dashboards and Excel reports behind this reporting.
- Developed a Data Task App (Forms, SharePoint, Power Automate, Power Apps, Power BI) to centralize data requests previously sent by email, Teams and in person, with SLA, status and workload tracking for management.

Business Intelligence Analyst (Part-Time, Remote) **Jul 2022 – Mar 2026**

BM Enterprises Management | Egypt

- Analyzed sales data against KPIs to spot trends and performance gaps; presented findings on sales, customer experience and service quality in regular management meetings.
- Cut recurring reporting time by 30–40% by automating repetitive report preparation and data-cleaning steps.
- Built 30+ Power BI and Excel dashboards to track sales and business performance.
- Wrote SQL queries to extract reporting data; cleaned large datasets with Power Query and Python (Pandas).

Talabat | Egypt **Mar 2018 – Oct 2021**

Operation CC Reporting Specialist *Mar 2020 – Oct 2021*

- Built and maintained Power BI and Excel dashboards tracking contact-center KPIs for operations management.
- Prepared daily, weekly and monthly performance reports, cleaning raw operational data before release.
- Monitored agent and team KPIs against targets and flagged performance issues to supervisors for follow-up.

Customer Service Representative, promoted to Team Leader *Mar 2018 – Feb 2020*

- Handled voice and live-chat support against Quality, CSAT, AHT and SLA targets before moving into operations reporting.

PERSONAL PROJECTS

- **Dubai Real Estate Market Analysis, 2000–2026 (Power BI):** Analysis of 26 years of real property transaction data from Dubai Data, the government open-data platform, built with Power Query and DAX to track long-term market trends.
- **Retail Sales Analytics – FMCG (Python, SQL Server, Power BI):** End-to-end sales, product, customer and store analysis: Python data preparation, a SQL Server model and a Power BI report with DAX and Calculation Groups.
